Atterbury System The Clothes of Gentility

THE tailors employed in producing the clothing of the ATTERBURY SYSTEM were selected from the large commercial centers where they were employed by custom tailors of national repute. Such skill as this makes ATTERBURY CLOTHING the only desirable ready-to-wear attire for gentlemen. This would not be true if our clothing were turned out by machinery-for machine-made clothing can never attain the standard adopted by men of taste and culture. The ATTER-BURY SYSTEM is the modern method of making readyto-wear clothes by hand-in other words, we simply apply the methods of the custom-tailor on a very elaborate scale. The result is that we secure the individuality, the style, the finish, the grace and the refined appearance to obtain which you pay the merchant tailor his rather fancy prices. The ATTERBURY SYSTEM is the only serious rival of the high-class custom tailor, because it secures his results at a popular price.
